

bcryptjs - npm

1. What does this technology (library/framework/service) accomplish for you?

We used bcrypt to salt our passwords and hash them. We just need to call the hash function and pass in the password and the salt.

2. How does this technology accomplish what it does?

This library has all the algorithms and mathematics covered behind the scene.

This is the documentation for it <https://www.npmjs.com/package/bcryptjs>

3. License:

bcryptjs contributions will be under its MIT license. This license means we are free to use, copy, modify, merge, publish, and even sell the software that is made with bcryptjs which means it gives very limited restrictions on reuse as long as we include the MIT copyright notice.
