multer

1. What does this technology (library/framework/service) accomplish for you?
We used multer to handle multipart/form-data since users can upload either both text and images.

2. How does this technology accomplish what it does?
When we call the .post() function in node, we can pass multer as a middleware object. This middleware object will get passed to the request variable in the callback function.

The documentation is on this link
https://www.npmjs.com/package/multer?fbclid=IwAR3JgO9eEkVmw6CkxfPUeQkWZRZgiSiPL559mVcssxwTmtXwxAnMiNhQD88 and github.com/expressjs/multer

3. License:
multer contributions will be under its MIT license. This license means we are free to use, copy, modify, merge, publish, and even sell the software that is made with multer which means it gives very limited restrictions on reuse as long as we include the MIT copyright notice.

Permission is hereby granted, free of charge, to any person obtaining a copy of this software and associated documentation files (the "Software"), to deal in the Software without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute, sublicense, and/or sell copies of the Software, and to permit persons to whom the Software is furnished to do so, subject to the following conditions:
