rodal

1. What does this technology (library/framework/service) accomplish for you?
When users try to submit posts without inputting any text, images or videos, a pop up will show up to alert the users.

2. How does this technology accomplish what it does?
Rodal basically uses compiled HTML, CSS and Javascripts required for the pop ups. Obviously the Javascripts are used to show the pop up. The css makes the pop ups centered and it also creates the overlay effect. All of this can be easily achieved by writing the code from scratch, but rodal skips that process.

The documentation is on this link https://www.npmjs.com/package/rodal and https://github.com/chenjiahan/rodal

3. License:

rodal contributions will be under its MIT license. This license means we are free to use, copy, modify, merge, publish, and even sell the software that is made with rodal which means it gives very limited restrictions on reuse as long as we include the MIT copyright notice.
